

# Featured Project: High Court of the Judiciary, Glasgow

## Stone Type: Sandstone, Granite, Marble

From our initial appointment as Stone Design consultants, we subsequently tendered for and won the fixing packages for both the external sandstone cladding and the internal stonework. This included granite flooring, skirtings and staircases and travertine wall cladding.

Interesting features are the ornate, hand-carved crest outside the main entrance. Internally, there is "tactile" paving to assist the visually impaired at ramps and staircases and a frieze over the reception desk which is handlettered with judicial dictums. Our work was Highly Commended in the Interiors category of the Stone Federation Millennium Natural Stone Awards.
